ACADEMIC

August - November(2023)

CODE LAB

Web Application with PHP,Laravel,Ajax,MYSQL,React

SKILL

- PHP
- Mysql
- Html
- Bootstrap
- Node JS
- Git
- Mongo
- Laravel
- Javascript
- Css
- Ajax
- Express JS
- GitHub
- React

ABOUT

Looking for a stimulating role where I can leverage my skills and knowledge to drive positive change and exceed organizational goals.

WORK EXPERIENCE

Arbiter Business Group Co., Ltd   2025-May

PHP Laravel Developer

1. **Shwe Chan Gold**

Developed and maintained the SCgold web application using PHP, Laravel, JavaScript,Ajax, CSS, and Tailwind CSS, delivering robust back-end logic, dynamic user interactions, and responsive modern interfaces, while collaborating with the team to meet project milestones on time.

Job Portal   2024

I developed a comprehensive job portal using the Laravel framework, featuring a responsive user interface with Blade templates and Bootstrap for seamless multi-device experiences, and utilized MySQL for efficient database management and data handling.

Blog   2024

I developed a small-scale blog application using pure PHP with PDO for secure database interactions, session handling for user authentication, admin and user roles, pagination, search functionality, and a responsive frontend designed with HTML, CSS, and Bootstrap, successfully deploying and maintaining a fully functional platform for post management, user interaction, and secure data operations.

Shopping Project

I successfully developed a project utilizing PHP for backend logic, CSS for styling, MySQL for database management, HTML for structure, and PDO for secure database interactions.

I developed a PHP shopping project using pure PHP and PDO. This project includes features such as product category, sale order, weekly report, monthly report, best seller, and royal customer

Outsource Project

I built a Real Estate Management System (REMS) and an Emergency Call platform using the Laravel framework. This involved collaborating with frontend and backend teams to develop RESTful APIs, design and optimize database schemas, validate data, integrate external APIs, and manage authentication processes, utilizing MySQL, Git, and Laravel's advanced capabilities.

Rems_Laravel   2024

I was responsible for managing the storage of real estate transaction data within the REMS system, including sales and purchases. Additionally, I handled the property image module, which involved storing apartment and house images uploaded by agents. I also took charge of authoring comprehensive API documentation for the system.

Emergency Call   2024

In the Emergency Call system, I was responsible for managing the storage of critical details for individual service personnel. Additionally, I handled the user management features, including login, logout, and registration functionalities. I also took the lead in creating detailed API documentation for the system.

Futsel-app   2025

I developed the entire Futsel app using the Laravel framework, integrating jQuery Datatable, JavaScript, and Bootstrap. The project involved designing the database structure, creating the user interface, and implementing key functionalities.

Pizza-order-system   2024

In November 2023, I completed a comprehensive Code Lab course where I developed a fully functional pizza order system, utilizing HTML & CSS for responsive design, JavaScript for interactivity, PHP & Laravel for server-side logic and MVC architecture, and MySQL for managing user information, order details, and product data.

Movie Project (React)   2025

Responsive movie browsing site with REST API integration.
Used Redux for state management and Tailwind CSS for fast, consistent UI design.
